

KOHLER®
IN POWER. SINCE 1920.

Kohler Power India Company Profile

Introduction

Founded in 1873 by John Michael Kohler, Kohler Co. is a multi-division, multi-product company headquartered in Wisconsin, USA, with Mr Herbert V. Kohler Jr as the Chairman & CEO. Kohler, a leader in kitchen and bath plumbing fixtures, engines & generators, furniture & tile, and golf & resort, had a humble beginning from an enameled horse trough nearly 140 years ago. Today it has over 35000 associates in six continents, delivering world class products to enhance the gracious living of our customer. Kohler associates define the leading edge by living what we believe.

The Company:

- Founded in the Year 1873
- 55 + Plants across the Globe
- 35000+ Associates
- In Power Business since 1920
- Acquired SDMO in 2005 & Lombardini in 2007
- Acquired Uninterruptible Power Supplies Ltd. (UPS) in 2008

KOHLER Group:

Kohler is diversified in four business groups.

1. Kitchen & Bath Group: A leading kitchen and bath design company with diverse product and powerful portfolio of brands. The global leader surges its way into the luxury segment for its design, craftsmanship and innovation-knit together by a singular level of quality over a broad level of price point.

In 1967, THE BOLD LOOK OF KOHLER was craved for a new advertisement campaign for a broad range of lavatories with rich enunciation color. This was the start of many bold introductions to follow. To this day, the logo symbolizes leadership in design and technology in the plumbing industry.

2. Power System Group: From powering the rugged battlefields of World War I to the frozen polar caps of Antarctica, Kohler Power Systems has many first to its credits. Kohler entered the power industry with its cast iron gas engine driven generator that powered the rural America before the advent of line electricity. Today Kohler is the world's third largest generator manufacturing company with major acquisitions like Lombardini, SDMO, UPS and Maquigeral. Kohler has the widest range of generators ranging from 2.5kVA to 3300kVA.

3. Interior Group: The Kohler Interiors Group, composed of internationally recognized brands Baker, McGuire, Ann Sacks and Kallista, delivers gracious living to every area of the home.

4. Hospitality Group: The Kohler Hospitality & Real Estate Group is comprised of service businesses that capitalize on historic and environmental assets to create award-winning hospitality, world-class golf destinations and exceptional work and living communities. The American Club hotel was constructed in 1918 to provide comfortable housing to the immigrants working at Kohler. Restored in 1981 it was inducted in National Register of Historic Places and a rating of 5 star. Hailed among the world's top golf destinations, the resort's golf courses have won acclaim for the manner in which they complement the natural environment.

KOHLER
IN POWER. SINCE 1920.

Global Power Group

Global Power Group

Kohler entered the power systems market in the early 1920s with the world's first engine-driven electrical generator powered by a KOHLER® engine. This rugged unit delivered power to rural America prior to the advent of line electricity. Today, the Kohler Global Power Group is comprised of manufacturing facilities for engines and generators in four continents with worldwide sales, service and distribution networks and an arsenal of products and services engineered specifically to meet the demands of the markets they serve.

Kohler Global Power Group is currently one of the largest diesel and gasoline generator manufacturing company known for its reliability, quality and innovative technology. Kohler Power System has a wide range of generators including Marine, Industrial, Home, Portable and Mobile.

Product Profile of Power Systems Group

India Range: 3.5 –650 kVA

- Designed & assembled in the India plant
- Specially designed to be small and compact
- Customizable with wide range of standard and special options
- Compliant to India CPCB-II emissions and noise requirements

Import Range: REOZM Series

- Designed in USA, assembled in both Kohler USA and Singapore factories
- Using the latest generation heavy duty engines, designed for both prime and standby operation in very harsh environment
- Highly efficient electronic control systems which enable them to respond to strict stability requirements in terms of frequency, voltage and waveform
- Complies with ISO 8528-5, Class G3 requirements for transient performance
- Modular design enables quick and versatile customization to meet different project requirements and demands

KOHLER®
IN POWER. SINCE 1920.

Import Range: KD Series

- KD SERIES is the newest line of generators powered with our KOHLER Large Diesel Engines
- KD SERIES generating sets provide a wide range of power from 800 – 4200kVA (800 in 4000kWe) standby
- Ideal for every industrial power segment use and benefit from KOHLER's worldwide aftermarket parts and service network
- Developed over a 6-year period, each component was designed/tested to offer the best performance while maintaining high industry standards

KOHLER® Engines

A leading manufacturer of air- and liquid-cooled four cycle gasoline and diesel engines, KOHLER overhead valve models range from 4 to 65 HP. KOHLER engines are recognized for long life, easy starting, low fuel consumption, peak power and torque, with reduced noise and emissions. More turf and industrial professionals choose KOHLER engines to power their equipment than any other brand.

In June, 2007 Kohler acquired Lombardini. The partnership provides a strong complement to our existing Engine Business by adding a complete diesel engine line to serve the needs of our commercial and consumer customers worldwide.

Lombardini, founded in 1922, is a pioneer diesel engine manufacturer headquartered in Italy. With gasoline, petrol and diesel engines up to 90 HP for the industrial, transportation, agriculture, marine and light construction industries, Lombardini brings with it a legacy in the diesel power business as well as a manufacturing presence in Europe and India.

Lombardini's advances in cleaner, quieter diesel engines correspond with Kohler's ongoing commitment to environmentally sound products. It is represented worldwide through seven commercial subsidiaries and hosts more than 1,600 service locations. The company markets under four brands: Lombardini, Lombardini Marine, Ruggerini Diesel and Acme Motori

KOHLER®

Kohler Power India

KOHLER POWER INDIA

In September 1997, Kohler commenced its Indian operation in Bangalore, for capturing the growing power demand of South Asia.

Currently Kohler Power India operates from its headquarter at Pune, with branches at Delhi, Bangalore, Chennai & Kolkata. The India operation covers India, Nepal, Bhutan and Sri Lanka with extensive channel network and their outlets at almost all the major cities across the country.

Manufacturing Facility:

With the acquisition of Lombardini in June 2007, Kohler could complement the existing engine business by adding a complete diesel engine line. Lombardini, a pioneer diesel engine manufacturer headquartered in Italy, has five manufacturing facilities globally, one of which is located in Aurangabad, Maharashtra. The 15 acre state of the art engine manufacturing and genset assembly facility started in June 2008 to cater to the South Asia Market.

- ISO 9001:2008 Certified Company
- ISO 14001 Certified Company
- Automated Genset building on Conveyors for generator ranging from 15 to 250kVA
- Over head crane facility available from 0.4 tone to 5 tone
- Automatic quality check at every point
- Computerized test bed
- All sets undergo 100% & 110% load test
- Temperature Rise test & Voltage Regulation Test.
- Noise Test
- Vibration Test
- Durability of 500+ hours running on every New Product Development.
- Post Pack Audit

After Sales Service

After Sales Service

Kohler Power India, has a dedicated Service & Parts division with a wide services network encompassing the entire South Asia. The Service team consists of highly experienced service engineers. All the service personnel undergoes intensive and continuous training process round the year. The engineers are trained in various training facilities of Lombardini across the globe, along with the training centers of other engine and alternator manufacturers that are used in Kohler gensets. Along with it Kohler also has an extensive dealer network equipped with highly trained service team to facilitate onsite troubleshooting. Extended services of Kohler Power India encompasses the following:

1. Overhauling of Engine
2. Annual Maintenance Contracts
3. Operational and Maintenance contracts
4. Periodical training for service engineers and customer

Kohler being a high innovation and technology driven company, has full range of modern tools, equipments and solutions for servicing needs. Kohler has a manpower of over 75 service personnel equipped with laptops, cell phones and modern tool kits so that they are accessible to customer round the clock.

All the Authorized Dealers of Kohler maintains a stock of necessary parts at their end to give prompt services to the customers. The stocking level is based on the genset population and consumption pattern of the particular territory. Apart from that Kohler has warehouse in Aurangabad and Bangalore which stores all the essential and critical parts.

Spares Support

Kohler works on three levels of stocking of spares based on consumption pattern.

Level 1: Dealer stocks the consumables, Essential and Critical parts.

Level 2: Bangalore warehouse stocks essential, Critical spares and spares required for top overhaul.

Level 3: Factories at Aurangabad & Singapore stock all the major components
