TOTAL SYSTEM INTEGRATION. EVERYTHING WORKS TOGETHER.

Reliability of power systems is critical. Your business depends on it. At Kohler, we build industrial power systems that are proven to work because total system integration is engineered in from the start.

For more than 90 years, Kohler has earned a global reputation as a pure power expert — in large part to our strict quality standards. Our power systems are equipped with Kohler innovation, including generators, transfer switches, switchgear and controllers. Enduring the industry's toughest testing process, including transient power testing, cooling sound and more, every part is built to work with the entire system and perform in the most demanding environments before they are shipped out.

Our power systems are built for nearly every application, powering everything from gas stations to hotels and hospitals, as well as military operations and airports. So you can be rest assured that our products will work when you need them most.

DEPENDABLE POWER AND PERFORMANCE TRIED, TESTED AND PROVEN TO WORK.

Critical power applications are part of every industry; protecting them starts with reliable KOHLER® generators, available in diesel, natural gas and LP gas configurations. Our diesel models deliver dependable power to a wide range of output requirements. From small-load residential and business to heavy industry, every KOHLER generator is engineered to provide maximum power, performance, flexibility and fuel efficiency.

Today, Kohler provides integrated solutions to streamline the specifying process. Our industrial generators are diesel-fueled models — ranging from 3.5 kVA to 3,300 kVA @ 50 Hz complete with electronic controls and automatic transfer switches. To help cater to unique installation environments, we also offer a range of accessories, including controls, silencers, enclosures, fuel tanks and block heaters.

Disclaimer: Information in this publication represents product data available at the time of print. Kohler reserves the right to change this publication and the products represented without notice and without any obligation or liability.

1 KOHLER® Industrial Generator

Our full suite of generator sets are made to power all of your applications (simple to complex) and are available in a range of sizes up to 3300 kVA (3200 kW). And you can customize them any way you like with a variety of accessories.

2 DECISION-MAKER® 6000 Controller

Our most advanced controller, the Decision-Maker 6000 enables load sharing and synchronization for up to eight generator sets in the Kohler Decision-Maker paralleling system. In conjunction with the master control panel, the Decision-Maker 6000 is the brain of the system.

3 Master Control Panel

Responsible for generator set and load management, the master control panel handles load add/shed; number of generator sets online; and also monitors electrical and mechanical loads along with event logging and alarms.

4 Power Distribution Switchboard

This equipment provides the connection for the generator sets to create the overall power output required. It also accommodates the motor-operated breakers for each generator and load breakers needed to meet the customer's demands.

5 Automatic Transfer Switch (ATS)

The ATS intelligently selects the power source and transfers loads. Kohler offers a wide range of transfer switches including standard transition, closed transition and bypass to meet all applications and requirements.

KOHLER SERVICE AND SUPPORT THE HELP YOU NEED. ANY TIME, ANYWHERE.

Anybody can claim to offer an unrivaled level of support, but it is another thing to deliver on that promise. Today, Kohler's distribution network spans across multiple sales offices in countries throughout the Asia Pacific region.

Unlike other generator manufacturers, Kohler certified distributors and dealers specialize in power. This means our service network can be called on for anything related to your generator and its components.

With Kohler, you enjoy world-class service and support from a global service network.

REOZM SERIES GENERATORS

BRED FOR THE TOUGHEST JOBS ON EARTH.

1065-2500 kVA
852-1950 kW

PACKED WITH POWER, ENGINEERED FOR TOTAL PERFORMANCE

The need for constant and stable power in today's business environment is vital to keep operations up and running with minimal disruption. Power reliability is required to ensure maximum uptime and provide total peace of mind.

The REOZM-series generators offer total, reliable and continuous power, accepting one-step full rated load. Incorporating Kohler's innovative technology, the REOZM range enables a seamless integration that allows versatile system configurations for dependable performance and uptime reliability.

STANDARD FEATURES

TESTED AND APPROVED

KOHLER generators meet tough industry testing and quality standards (UL, CSA, IBC, NFPA).

RAPID RESPONSE

Our generator sets enable a faster response in powering up to deliver quality power during voltage and frequency changes.

EASY INSTALLATION

Our quickest install ever – large stub-up areas; easy access to fuel, load and exhaust locations.

1 HIGH-AMBIENT COOLING

Designed to meet your extreme operating conditions

2 KOHLER PMG ALTERNATORS

Provide advanced short circuit capability and meet NEMA MG 1, IEEE and ANSI standards

3 KOHLER DECISION-MAKER® CONTROLS

Available with a variety of controls – basic, advanced and paralleling

4 OPTIONS AND ACCESSORIES

Improved motor-starting alternators, heavy-duty air cleaners, enclosures, fuel tanks, block heaters, multiple circuit breakers and more

2000REOZM

STANDARD FEATURES AND ACCESSORIES

Engine	
Four-stroke water-cooled diesel engine	Standard
Electronic governor	Standard
Air cleaner, dry	Standard
Air cleaner, heavy duty	Option
Air cleaner restriction indicator	Option
Oil filter	Standard
Block heater, 220/240 V	Option
Alternator	
Single-bearing alternator, insulation class H	Standard
Drip-proof construction	Standard
Permanent magnet-excited generator (PMG)	Standard
Reactive droop compensator	Option
Generator Set	
Structural skid in solid mount	Standard
Decision-Maker 550 controller	Standard
Decision-Maker 6000 controller	Option
KOHLER cream beige color	Standard
Line circuit breaker	Option
Oil drain extension	Standard
Spring isolator	Option
Residential silencer	Option
Flexible exhaust connector	Option

Cooling System	
Unit mount radiator for 40°C ambient	Standard
Unit mount radiator for 50°C ambient	Option
Protection guard for fan and revolving parts	Standard
Low coolant level shutdown (unit-mounted radiator models only)	Standard
Radiator core protective grill	Standard
Starting System	
Charging alternator and starter motor voltage	24 V
Battery (24 V)	Option
Battery rack and cables	Option
Battery charger	Option
Diesel Fuel System	
Fuel filter	Standard
Flex fuel lines (installed)	Option
Flex fuel lines (loose)	Option
Literature	
Operator and installation literature	Standard
General maintenance literature kit	Option
Overhaul literature kit	Option
Production literature kit	Option

1) Also available in 230/400 V and 220/380 V.

2) Also available in 220/380 V.

3) Prime power ratings apply to installations where utility power is unavailable or unreliable. At varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO-8528/1, overload power accordance with ISO 3046-1, BS 5514, AS 2789 and DIN 6271.

4) Standby power ratings apply to installations served by utility source. The standby rating is applicable to varying loads for the duration of power outage. There is no overload capability for this rating. Ratings are in accordance with ISO 3046-1, BS 5514, AS 2789 and DIN 6271.

5) The dimensions and weights apply to an unhoused generator set without options.

6) Wet weight, without fuel.

KOHLER DECISION-MAKER® CONTROLS

TECHNOLOGY SO ADVANCED, IT'S EASY.

At Kohler, we don't do one size fits all. With our Decision-Maker controls, we design custom packages, tailored to your needs – from basic controls to multiple generator paralleling.

Plus, Kohler makes each controller easy to operate with user-friendly displays and keypad functions. And if that weren't enough, our complete line of Decision-Maker controllers features advanced network communications for remote monitoring as well as adjustable parameters to accommodate your specific application.

STANDARD FEATURES

TESTED AND APPROVED

Our controls meet NFPA, UL and CE standards.

INTEGRAL VOLTAGE REGULATOR

KOHLER controls deliver precise voltage regulation (+/-0.25%) to protect your sensitive equipment from poor power quality.

SEAMLESS SYSTEM INTEGRATION

Every controller works with our automatic transfer switches and switchgear for complete system integration.

ALTERNATOR PROTECTION

This must-have technology protects the alternator from thermal overload.

REMOTE COMMUNICATIONS

MONITOR SOFTWARE

Monitors and controls generator sets and transfer switches from your personal computer.

POWERSCAN™

Provides system monitoring around the clock using wireless technology to send messages to your phone, fax and email.

REMOTE ANNUNCIATOR

Offers an economical solution for remote annunciation of faults and status conditions for NFPA-110 compliance.

- 1 EMERGENCY STOP BUTTON**
Turns off generator set immediately
- 2 CONTROL BUTTONS**
Control synchronizing breakers and generator set operation (Off/Auto/Run)
- 3 STATUS INDICATORS**
Display generator set mode, breaker and synchronization status
- 4 DIGITAL ALPHA/NUMERIC DISPLAY**
Displays faults, warnings, codes and metering
- 5 KEY SWITCH**
Secures your program settings
- 6 PUSH-BUTTON KEYPAD**
Sets custom parameters, displays menus, resets faults and more

AUTOMATIC TRANSFER SWITCHES

FORGET THE FORECAST. WE HAVE YOU COVERED.

Bridging the gap between loss of utility and standby power is no small task, which is why KOHLER® automatic transfer switches are essential to KOHLER power systems.

Kohler's latest generation of transfer switches – featuring MPAC® controllers – are loaded with technology to ensure transfer of power from the utility to the generator set and back. When the grid fails, power is transferred to the standby system. And then it's back to business as usual.

STANDARD FEATURES

MULTIPLE APPLICATIONS

Find the perfect option. Our transfer switches are available in standard, bypass and service entrance configurations with open, programmed and closed transition operating modes, 30-4000 amps.

SEAMLESS SYSTEM INTEGRATION

Sit back and relax. Our transfer switches easily interface with KOHLER Decision-Maker® controllers.

ADVANCED COMMUNICATIONS

Each ATS comes loaded with technology. Ethernet and Modbus communications capabilities are standard.

CERTIFIED PACKAGES

Available packages are UL-listed, CSA- and IBC-certified.

1 CERTIFIED ENCLOSURES

Meet NEMA Type 1, 3R, 12 and 4X enclosure standards

2 BYPASS OPERATION

Eliminates interruption to the loads during maintenance

3 MPAC DIGITAL CONTROLLER

Provides a full array of features including communications, I/O, load management and other advanced functionality

4 HEAVY-DUTY CONTACTOR

Choose from any breaker, specific breaker and current limiting fuse rated mechanisms

5 AVAILABLE ACCESSORIES

Anti-condensation heater, voltage surge suppressor, line-to-neutral voltage monitoring, seismic certification and more
