

KD SERIES™ GENERATORS

for Industrial Power Systems

727 kVA – 4200 kVA | 582 – 4000 kW

KOHLER®
IN POWER. SINCE 1920.

POWER IS WHAT WE DO.

SINCE
1920

Welcome to an entirely new generator experience.

The next leap forward in industrial power. With almost a century of engineering know-how behind them, our new class of KD Series generators are built with an eye on the future—designed to last for decades. Ranging from 800 kVA/kW to 4200 kVA/4000 KW, this new range of Industrial Generators is perfectly suited for all industrial applications, providing better fuel economy and a smaller footprint than ever before.

So go ahead and explore our large diesel generators on the pages that follow. When you're ready to customize a system that meets your specific needs, give us a call. With specialized knowledge and an agile manufacturing process, we'll make it happen.

KOHLER® G-DRIVE ENGINES

Massive power in a compact package.

KOHLER G-Drive diesel engines are manufactured with the highest-quality materials and systems. Engineered over a six-year period for use in generator set applications, these engines are built for the toughest environmental conditions. Our G-Drive engines have proven their power and reliability during nearly 50,000 hours of arduous tests under rigorous operating conditions — both in the laboratory and on-site. All of which makes them ideal for a variety of crucial applications such as data centers, healthcare, mining and power plants.

KOHLER G-Drive diesel engines are exclusively manufactured in France and Switzerland, in factories offering the highest level of quality. The range comprises two different engine blocks, the K135 and K175 range, and covers a wide power range: from 560 to 4250 kWm.

CONCENTRATED POWER

KOHLER G-Drive diesel engines produce industry leading kW displacement in a package that enables a smaller generator set footprint while delivering the best fuel consumption at more nodes than any competitor between 800 and 2500 kW. The engine architecture, injection system and engine management of G-Drive engines have been designed to achieve optimal generator set performance.

OPTIMIZED SOUND LEVEL AND VIBRATIONS

Our G-Drive engine runs smoothly, quietly and with low vibration thanks to its low-noise combustion and optimized combustion pressure. The rigid design of the engine block, crankcase, oil sump, valve cover and subframe also helps reduce vibration. Less friction and vibrations means better reliability, greater strength, a longer service life and minimized fuel consumption.

OPTIMAL CONTROL OF THE INJECTION SYSTEM

Efficient ignition, combustion and exhaust are achieved through a high fuel pressure that produces finely vaporized fuel. Our engine's high fuel pressure common rail injection system reaches an injection pressure of 2200 bar for optimal efficiency and performance.

ROBUST AND RELIABLE

KOHLER G-Drive engines have been purposefully designed for long-life performance inside your generator sets for even the most demanding projects.

SLEEK AND MODULAR DESIGN

Our sleek, modular design means more efficient servicing of the engine, reduced spare parts inventory and more streamlined technician training. It also ensures better accessibility to components for optimized maintenance.

KOHLER GLOBAL SERVICE

Behind every KOHLER® Diesel G-Drive engine, there's a world of support. Numerous distributors, sales and service locations, and parts distribution centers make up our network, which extends across the globe. Plus, it's all backed by instant online access to everything from parts information to product warranties.

DAY-TO-DAY EXPERT ASSISTANCE

Kohler provides comprehensive support to engine technicians worldwide by offering:

- Commissioning
- Scheduled and unscheduled maintenance
- Repairs
- Technical documentation
- Product training

KD SERIES™ GENERATORS

Built for the most critical jobs on earth.

800–4200 kVA
800–4000 kW

REVOLUTIONARY AND RELIABLE

We engineer, test and fit every single component of our G-Drive engines. Our computer-aided quality-management system oversees every step of development, from the first stage of production through the engine's entire lifecycle, to ensure the highest level of quality.

TESTED AND APPROVED

Created specifically for generator set applications, our G-Drive engines combine greater power with superior efficiency. Reaching up to 43.5 kW/liter, KOHLER® G-Drive engines pair a compact engine with unrivaled kW displacement—delivering the highest power density on the market*. All KOHLER generators meet tough industry testing and quality standards (UL2200, CSA, NFPA).

SMOOTH-RUNNING

The KOHLER G-Drive engine runs smoothly, quietly and with low vibration—even under extreme operating conditions—extending service life and delivering cost-effective performance.

CONTROL AND MAINTENANCE

KD Series generators feature integrated controls for seamless communication and offer remote monitoring through a VPN connection. Easy-access bearing lube points, coolant level optical gauges on both circuits and oil replenishment systems help ensure the generator runs optimally and is easy to maintain.

ULTIMATE PERFORMANCE

The KOHLER G-Drive diesel engine's architecture, injection system and engine management have been designed to achieve optimal generator set performance.

FUEL-EFFICIENT

The common rail fuel system generates up to 2200-bar injection pressures for maximum efficiency, optimizing the combustion pressure curve through multiple injections. This produces industry-leading kW displacement in a package that enables a smaller generator set footprint while delivering the best fuel consumption at more nodes than any competitor between 800 kW and 2500 kW.

COMMON SERVICE PART NUMBERS

A modular system allows us to scale the number of components depending on the power required. Using standard components means fewer parts must be stocked in the field, and operators require less training. This reduces costs and improves response time.

*Higher power density at more nodes than any competitor between 800 – 2500 kW.

KD1750

1 EMISSION OR FUEL OPTIMIZED ENGINE

Clean-running engines, featuring closed crankcase ventilation design. Available in emission or fuel optimized version to meet your requirement on emissions standards or low fuel consumption

2 FUEL SYSTEMS

Common rail injection systems, designed specifically for the KOHLER large diesel. Enables injection at a pressure up to 2200 bar for maximum efficiency

3 HIGH-AMBIENT COOLING SYSTEMS

Designed to meet extreme operating conditions, segmented radiator core sections allow for single replacement instead of entire core. Cooling system designed to give full power up to ambient temperatures of 50°C

4 EFFICIENT ALTERNATORS

Provide advanced short circuit capability and meet NEMA MG 1, IEEE and ANSI standards; multiple alternator options available

5 KOHLER GENERATOR CONTROLLERS

Generator set controller, designed by Kohler to control all functions and guarantee optimal performance. The large touch screen on the ergonomic human-machine interface makes for easy operation on paralleling, load and generator management

6 LOW COMBUSTION AIR

Requires less air to run, creating fewer emissions and enabling optimal performance inside an enclosure

7 INNOVATIVE CYLINDER HEAD

An innovative cylinder head design enabling better circulation of fuel, more efficient combustion and optimized exhaust gas emission flow

8 OPTIONS AND ACCESSORIES

Multiple circuit breakers, battery heaters, block heaters, battery charger, prelube pump and centrifugal oil filter

France models

① DIESEL SEPARATOR PRE-FILTER

This is a filter that enables water contained in the diesel to be removed, thereby improving the engine's protection.

② FILTER WITH INTERCHANGEABLE CARTRIDGE (EN02)

These dry air filters with removable and interchangeable cartridge for dusty environments can be removed and cleaned with blown air. This option is required when the generator set is used in dusty environments.

③ OVERSIZED ALTERNATOR (A0001B)

For installations with significant electrical constraints, this option ensures improved performance.

④ IMPREGNATION

D-type: for tropical type environments with relative humidity > 95%, excluding coastal environments.

R-type: for harsh industrial environments with humidity level > 95% and coastal environments.

⑤ SILENCER IN OPEN VERSION (EN07, EN08, EN09)

For "open" version of the generator sets, 3 noise reduction levels are available to meet the constraints of various installations: 9 dB(A), 29 dB(A) et 40 dB(A).

⑥ OIL CENTRIFUGE (EN19 ONLY FOR KD2000 - KD2800)

This allows the maintenance interval to be increased from 500 hours to 1500 hours (depending on the oil quality).

⑦ AUTOMATIC OIL MAKE UP WITH TANK (EN18)

Automatic oil make up system enables a constant oil level to be maintained in the crankcase during operation. It comprises a new oil reserve, an oil level regulator and a hose and valve assembly mounted on the generator set's base frame.

⑧ AUTOMATIC FUEL FILLING KIT (FD08)

This kit allows the fuel tank to be automatically filled from an external storage tank. It includes:

- an electric pump with automatic control governed by a gauge with level contacts.
- a manual back-up pump.

It can be used for extended periods of time without topping up the diesel. It is particularly well-suited for remote locations.

ENCLOSURES

Keeping the noise in.

KOHLER® enclosures are bolstered by heavy-duty aluminum and acoustic insulation to protect your investment and keep the noise down. In addition, we coat every unit* with Power Armor™ (a textured industrial finish) for heavy-duty durability in harsh conditions. The new design includes a sloped roof to increase the life and safety of the generator.

KD1750*

- ➊ **SERVICE ACCESS**
Multiple personnel doors and removable panels offer easy access to generator control, fuel fill, fuel gauge, oil fill and battery
- ➋ **INTERNAL EXHAUST SYSTEM**
Features insulated exhaust silencer for improved aesthetics, safety and noise reduction
- ➌ **OIL AND RADIATOR DRAINS**
Provide an easier, quicker way to service your generator
- ➍ **AIR INLETS**
Louvered air inlets limit water ingress and shorten overall length of enclosure
- ➎ **SLOPED ROOF**
Reduces water pooling and increases enclosure shelf life
- ➏ **AVAILABLE ACCESSORIES**
Electrical packages, heaters, motorized louvers, stairs and more

STANDARD FEATURES

Fitted Enclosures

Sound enclosures feature durable aluminum construction, stainless steel external hardware and an LED emergency lighting system.

Quiet Performance

Our SL1 and SL2 enclosures offer acoustic insulation to meet your quiet applications.

Advanced Corrosion Protection

Power Armor* is a textured automotive-grade finish that surpasses a 2500-hour salt spray exposure test and resists fading and scratching.

Certified Packages

Enclosures are UL2200 tested and approved, IBC-certified, OSHPD-certified and meets up to 181-mph wind rating.

*US models only.

**France models only.

CONTAINERS

A versatile range of soundproofed containers.

You are faced with numerous installation constraints. Our containers can be adapted to meet all your needs. Thanks to their standard dimensions, they are easy to transport. Our turnkey containers have an integrated fuel tank which means they are ready to run. Their coolant systems, with an integrated silencer and sound traps, provide a highly economical solution.

ISO CONTAINERS

ISO containers are adapted to emergency applications with no harsh environmental constraints.

Available as 20-foot High Cube

CSC* certified

Adapted to standard environments

PRODUCT PLUS POINTS

- Flexible Integration
- Low Sound Level
- No Loss of Power up to 40°C
- Simplified Maintenance
- Accessible Control/Command and Power Components
- Short Production Lead Times

CSC* certified

Double maintenance door

Harsh atmospheres (heat, dust)

CPU type containers are designed to be adapted to the most demanding environments. Robust and modular, they are specially conceived to meet the very stringent constraints of production applications.

Available as 40-foot High Cube

France models

GENERATOR SET CONTROLS

Kohler offers a unique range of specific control units: M80, DEC4000 and APM802. These control units offer a wide range of possibilities, from simplified running to the option of managing the most complex coupling operations, and can be adapted to suit every need. Note that the modularity is made easier by the fact that each optional peripheral device (air cooler, daily service tank, oil make up, etc.) has its own protection. The M80 and DEC4000 control units are available for France models only.

M80 CONTROLLER

Dual-Function.

The M80 can be used as a basic terminal block for connecting an electrical cabinet box and as an instrument panel with a highly intuitive LCD screen giving an overview of your generator set's basic parameters. It is equipped with an emergency stop button and a customer terminal block, and has CE conformity.

Emergency stop button

LCD screen

The screen can display all of the engine's physical values:

- oil gauge
- coolant temperature
- oil temperature
- engine speed
- battery voltage
- charge air temperature
- fuel consumption
- etc.

The engine faults can also be displayed. The M80 records several events to facilitate diagnostics and can control the main engine functions:

- starting
- speed adjustment
- stopping
- droop
- etc.

DEC4000 CONTROLLER

Ergonomic and Intuitive.

The KOHLER® DEC4000 control unit is straightforward and user-friendly, with the emphasis on communication (USB connections, PC connections, control software and remote operation). It offers simplicity with a reduced number of buttons to operate your generator set.

Screen

Screen with contrast which adjusts to all types of light. Viewing and remote control functions with option to send an e-mail, text message or fax in the event of an alarm or a fault (optional).

Operation Conditions

Tropicalization of the electronic board to withstand conditions of extreme humidity.

Functions

Compliance with numerous legal and regulatory requirements (EC). Integrated diagnostic tool to guide the user when alarms or faults appear. Integrated maintenance monitoring (screen display of planned maintenance procedures).

Connectivity

2 USB ports under sealed cover.

APM802 DIGITAL CONTROLLER

Technology so advanced, it's easy.

The APM802 command/control system is specifically designed for operating and monitoring power plants for markets including hospitals, data centres, banks, oil and gas sector, IPP and mining. The Human Machine Interface (HMI), designed in collaboration with a company specializing in interface design, facilitates operations with a large 100% touch screen. The pre-configured system for power plant applications features a brand new customization function which complies with the international standard IEC 61131-3.

OPERATING SCREEN

Illustration may vary from actual product.

ETHERNET COMMUNICATION: INNOVATIVE AND PATENTED

Communication via APM802 guarantees a high level of equipment availability and facilitates the remote control of the HMI for an enhanced user experience. Additionally, various connections can be made via the Ethernet using fibre optics or combined with copper wire. System communications are separated from external communications to allow full control of risk management.

The ring is created by several Ethernet segments and groups together regulation and PLC communications.

KOHLER GENUINE PARTS

The best way to protect your power.

Behind every KOHLER® generator, there's a world of support. Numerous distributors, sales and service locations, and parts distribution centers make up our global network. Plus, it's all backed by instant online access to everything from parts information to product warranties.

THE KOHLER DIFFERENCE

KOHLER Genuine Parts work in perfect harmony with your generator, maximizing engine performance, prolonging engine life and protecting your investment. Superior design and top-quality materials result in maximum power, longevity and low total cost of operation. As a result, they enhance your peace of mind, increase your uptime and lower your maintenance costs.

HIGH QUALITY SPARE PARTS AND CONSUMABLES

KOHLER generator sets are manufactured to high quality standards. Based on their specifications, each spare part and consumable is specially tested and approved for optimal compatibility with your engine.

KOHLER parts and consumables work in perfect harmony with your product. They maximize its performance and extend its service life, thereby protecting your investment.

PARTS AVAILABILITY

Parts required for maintenance and repairs are stored in warehouses strategically located around the world. We also draw on an international distribution network and dedicated personnel with specialized tools to ensure quick availability.

OPTIMIZED REPAIR AND MAINTENANCE KITS

The kits are designed to facilitate collective purchase orders for parts that need replacement at the same time. They guarantee a high level of responsiveness.

WARRANTY EXTENDED BEYOND MARKET STANDARDS

The KD Series generator sets are guaranteed for:

- 3 years 1000 hours for standby applications.
- 2 years 8700 hours for prime applications.

SERVICE AND SUPPORT

The help you need. Anytime, anywhere.

You're never too far from Kohler. Across the world, more than 800 locations are ready to provide sales, installation and aftermarket support services. And each one offers expertise in power specifications, equipment and integration. There's no question they can't answer. We should know, we trained them ourselves.

Plus, if you ever need assistance in the middle of the night, we'll take care of you. Kohler Power professionals are available to offer troubleshooting, advice, service and support.

KOHLER® AND SDMO®: OUR STORY

A global force in power solutions since 1920, Kohler is committed to reliable, intelligent products, advanced engineering and responsive after-sale support.

And you can find us on nearly every continent on the planet. Over the years we've amplified our global reach—acquiring SDMO Industries, an international leader known for its premium range of generator sets.

Together we've built on the legacy of two leading brands to create one of the largest global manufacturers of generators—and continued an unwavering focus on reliable power systems and innovation.

Our R&D, manufacturing, sales, service and distribution facilities span the globe from Wisconsin, USA, to Brest, France. And while we've maintained two world-renowned brand names, today Kohler and SDMO operate as an integrated global organization that's leading the way in design and manufacturing.

We deliver integrated industrial power systems for emergency, prime and continuous applications worldwide—from data centers and hospitals to water treatment facilities and government offices. With a deep understanding of your industry, we excel in designing customized power systems that simplify your most complex challenges.
